

## NOTES AND CORRESPONDENCE

---

This section of the journal is available for wood scientists and technologists to publish technical notes and accounts of work in progress, as well as to discuss matters of education and professional development. In general, such material should be limited to no more than six double-spaced type-written pages. Where applicable, contributions should appear in the approved style for technical articles in *Wood and Fiber*.

Readers are invited to submit discussions of articles that appear in *Wood and Fiber* for publication in this section. Any individual who wishes to discuss an article should submit his comments (in duplicate) soon after publication of the article. The paper

being reviewed should be identified by title, author, and date of publication.

No discussion will be published unless the author of the original article has been provided with a copy of the discussion and has had an opportunity to submit a reply to the Editor, to be published with the discussion. Discussions and replies should not exceed the length suggested above. Where pertinent, references to the literature should be included.

It is anticipated that discussion and replies in *Wood and Fiber* can add, for both authors and readers, a dimension not normally found in technical journals.

## PERSONAL NOTICES

---

Members of the Society are invited to use this section of the journal for brief notices of interest to wood scientists and technologists. Notices of employment sought or offered, exchanges of materials, sale or purchase of technical publications are a few examples of material appropriate for inclusion. Rates for

a single insertion are \$.15 per line or any portion thereof. Students seeking either summer or permanent employment may submit ten lines at no cost. Copy should be sent to the Editor at least two months preceding publication. Bills will be rendered by the Secretary-Treasurer after publication.

*Teaching Research Position in Wood Technology.* Person is expected to conduct Wood Technology and Wood Utilization courses and supervise research of graduate students in this work. Applicants should possess a Ph.D. Nine-month appointment as Associate Professor with salary equivalent to experience; opportunity for summer research. Write: Gene A. Hesterberg, Head, Department of Forestry, Michigan Technological University, Houghton, Michigan 49931.

*Position wanted.* Wood technologist with experience in economics, biometrics, and research administration seeks research and/or teaching position. Graduate, B.S., (University of New Brunswick), M.F. (Yale), Ph.D. (Oxford). Considerable knowledge of tropical problems. Reply: c/o Executive Secretary, Society of Wood Science and Technology, Box 5062, Madison, Wisconsin 53705.
