Erratum

Correction to article *Variations in Ultrasonic Wave Velocity and Dynamic Young's Modulus with Moisture Content for Taiwania Plantation Lumber* by Song-Yung Wang, Chih-Ming Chiu, and Cheng-Jung Lin, published in *Wood and Fiber Science*, Number 3, July 2002, pp. 370-381 has a correction to formula (2). Formula in article is currently written as

$$DMOE = (V_u)^2 \rho / g$$

where V_u was the velocity of ultrasonic wave in the longitudinal, radial and tangential direction (m/s), and ρ was the bulk density (g/cm^3), and g was the acceleration of gravity (9.8 m/s^2). The correct formula is

$$DMOE = (V_u)^2 \rho$$

where DMOE (Pa), V_u (m/s) and ρ (kg/m^3).
